Subject: RE: Revised Additional CSM and FS Database Edits Portland Harbor FS Section 1

Kristine –

Please find attached a proposed redline/strikeout version of FS Section 1. This version incorporates additional text on the fate and transport CSM and FS database that you requested at the August 25th FS technical meeting. This version shows just the most recent redlines/strikeouts related to the CSM and FS database. Note that acceptance of the redlines in the remainder of this version of the document is not intended to reflect LWG agreement on the remainder of the document. Rather, this format change was made solely to make the newest revisions more apparent. Please see the LWG's August 29, 2014 letter and attachments regarding Section 1 regarding LWG positions on Section 1 text.

In addition, as you also requested on August 25, attached is an Appendix A file that provides additional detail on the FS database. This redline shows differences between the draft FS database appendix and the new proposed Appendix A for the revised FS.

Our understanding is that EPA intends to consider the incorporation of these additional text changes as part of EPA's overall deliberations on the final content of Section 1.

Please let me know if you have any questions about these files.

Carl
